

NAVNEETH ANIL KUMAR

Product Manager, AI R&D | o9 Solutions

anil.navneeth@gmail.com • +91-97313-56910 • linkedin.com/in/navak

SUMMARY

AI Product Manager with 4+ years at o9 Solutions. Owns the knowledge graph and agentic configuration products that cut enterprise planning implementations from 4-6 months to weeks. Moved into product from delivery, after three years configuring the same platform by hand for Fortune 500 retailers.

EXPERIENCE

Product Manager, AI R&D | o9 Solutions

Sep 2025 – Present

- Own the Config Graph, a knowledge graph of platform configuration that lets AI agents identify and disambiguate measures, attributes, views, and plugins. Agent Builder, Skill Builder, and every other AI R&D product read platform context through it.
- Led Config Model Extension, an agentic engine that plans and executes configuration against o9's reference models. Greenfield builds and extensions that took 4-6 months now ship in weeks.
- Directed Config Designer UI, replacing a click-heavy legacy tool that gave users no way to see how a tenant was actually configured. Runs on the Solution Architect agent built for Config Model Extension.
- Shipped four more products: Synthetic Data Generation for demos and load testing, Usage Analytics for process mining on user actions, a middleware LangGraph harness with LLM caching, and a docs portal that publishes from the codebase on release.

Consultant, Delivery | o9 Solutions

Jul 2022 – Sep 2025

- Led replenishment planning delivery for Starbucks, a \$26B+ retailer. Migrated the SCM solution from Hadoop to Kubernetes for ~30% potential software cost savings.
- Cut runtime on overstock and understock identification by over 70%. Added substitute-item logic to inventory planning and gave planners a choice between automated and adjustable ordering at the item-store level.
- Built Python and PySpark tools that removed repetitive setup work for o9 implementers. Ran org-wide training on platform performance and scalable solution design.

Business Analyst Intern | Goodera

May 2021 – Jun 2021

- Built reports and dashboards for the Growth team, then implemented the strategies that came out of them. Helped onboard process-automation tools for business operations.

Software Development Intern | Smarkt

Nov 2020 – Apr 2021

- Built features for consumer mobile apps in Java and Kotlin using MVVM. Worked on API integration, bug fixing, and performance tuning.

AWARDS

Innovation of the Year | o9 Global Hackathon

2025

- Entered solo against 250+ participants working in teams and won the top award.
- Built Flo9, an agent that traces how any platform measure is calculated and explains the lineage in plain English. Doing that trace by hand took engineers up to a week.
- Demoed to Starbucks' CS team, who asked for access immediately.

LEADERSHIP & ACTIVITIES

ISTE NITK | Head of Business Society & Chief Coordinator

Apr 2021 – Apr 2022

- Led 55+ members and oversaw 8 projects across finance, economics, data analytics, and marketing.
- Ran social media and marketing. Grew the following 40% organically in 8 months and raised sponsorship for PAN-India events.

EDUCATION

National Institute of Technology Karnataka (NITK), Surathkal

2022

B.Tech, Electrical and Electronics Engineering

SKILLS

AI/ML Product Management • Agentic Systems & LLM Applications • Knowledge Graphs • MCP Tooling • LangGraph • 0→1 Product Development • Enterprise SaaS • Supply Chain Planning • Process Mining • Python • PySpark
